Core Java – Exercise

Ex – 1: For any given integer, determine whether it is odd or even.

Ex – 2: Calculate and return the area of a circle, given the radius.

Ex -3: Given a number from 1-12, return the name of the appropriate month

Ex -4: For any given (small) number, print a square of asterisks with the length of each side equal to the given number.

Ex -5: Convert an upper-case letter to a lower case letter. (*Hint:* Check first to be sure that it is not lower case already.)

Ex -6: For any given integer, find the factorial.
